How to apply
1 Remove pipette from the package.
2 Hold pipette in an upright position, twist and pull off cap.

3 Use reversed cap to twist and remove seal from pipette.

4

Dogs < 25kg:
With the dog in the standing position, part the coat between the shoulder blades until the skin is visible. Place the tip of the pipette on the skin and squeeze firmly several times to empty the contents directly onto the skin.

For dogs > 25kg
The entire contents of the pipette(s) should be applied evenly to three or four spots all located at different application sites along the dog's backline from the shoulder to the base of the tail. At each spot part the coat until the skin is visible.

Cats and rabbits:
Part the hair on the pet's neck at the base of the skull until the skin is visible. Place the tip of the tube on the skin and squeeze firmly several times to empty its contents directly onto the skin.
